Riley Stuart Myers

Houston, TX | (832) 847-1278 | rsmcosc@gmail.com
GitHub: github.com/rileystuartmyers | LinkedIn: bit.ly/rsm_linkedin | Portfolio: http://studev.org

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on software development experience in C++, Python, SQL, JavaScript, and machine learning. Experienced in developing desktop applications, database-driven programs, machine learning systems, and evaluating large language models and multimodal AI systems.

TECHNICAL SKILLS

Languages: English, Spanish
Programming Languages: C++, Python, JavaScript, SQL, HTML/CSS, C#
Software Development: Desktop Application Development, Front and Backend Web Development
Machine Learning & AI: Neural Networks, Deep Learning, Computer Vision, Large Language Models, Multimodal AI
Libraries & Frameworks: OpenCV, OpenGL, ImGui, Qt, .NET, Windows Forms
Databases & Data: SQLite, SQL, Data Processing, Data Preprocessing
Development Tools: Git, GitHub, Visual Studio, Qt Creator, Node.js

EDUCATION

University of Houston, Houston, Texas
Bachelor of Science in Computer Science | December 2024

PROJECTS

Breast Cancer Neural Network | github.com/rileystuartmyers/Breast_Cancer_CNN
- Developed a deep learning image-classification system using the **ResNet101** architecture.
- Applied **transfer learning** to leverage pretrained feature extraction while retraining the classification layer for the target dataset.
- Achieved greater than **90% training accuracy** and greater than **80% testing accuracy**.
- Documented dataset and model performance throughout development.
- Earned **3rd place at the 2025 HPE AI & Data Science Showcase**.

BookSQLite | github.com/rileystuartmyers/booksqlite
- Developed a lightweight **C++ desktop application** for managing a personal book collection.
- Implemented **SQLite** for persistent on-disk database storage and data management.
- Used **OpenGL and ImGui** for graphical rendering and user-interface development.
- Integrated **Native File Dialog (NFD)** and **MuPDF** for file selection and raw document data processing.
- Implemented **zlib compression**, reducing storage requirements by more than 30% across thousands of files.

Photo Sorter | github.com/rileystuartmyers/Photo-Sorter
- Developed a **C# desktop application using .NET and Windows Forms** for organizing and categorizing image files.
- Implemented configurable source and destination directories and folder creation functionality.
- Developed image visualization and file-counting features to provide users with progress information.
- Designed the interface around usability and efficient file-management workflows.

Ohio Camera Trap Neural Network | github.com/rileystuartmyers/OhioSmallAnimalsCNN
- Developed a neural network for classifying high-resolution camera-trap images.
- Achieved approximately **95% training and validation accuracy**.
- Implemented image dataset preprocessing and parsing.
- Optimized preprocessing operations to process the dataset more than **3x faster** than comparable implementations.

CERTIFICATIONS

AWS Certified Solutions Architect Associate - Amazon, 2026

TECHNICAL EXPERIENCE

Outlier AI — Artificial Intelligence Technician | December 2024 – Present
- Evaluate and improve industry-level AI systems by creating, reviewing, and analyzing challenging prompts and model-generated outputs.
- Perform technical evaluation involving **C++ programming, discrete mathematics, and graph theory**.
- Contributed to 10+ independent AI projects involving **large language models, spoken-language models, multimodal models, and C++ debugging tools**.
- Maintain a peer-reviewed rating above 80% while evaluating model performance and output quality.

ADDITIONAL EXPERIENCE

Domino's — Delivery Driver | July 2026 – Present
- Deliver customer orders accurately and efficiently while providing excellent customer service.
- Manage multiple deliveries by memorizing routes and reordering orders to keep delivery times low.

Walmart — Customer Service Associate / Shift Coordinator | August 2021 – April 2026
- Provide customer support and communication for thousands of customers and over 150 associates daily.
- Coordinate shifts, manage product returns, and respond to customer feedback.
